### **Non-Hazardous Waste Disposal Documentation** (Provided on CD)

**Appendix I**  
**Non-Hazardous Waste Disposal Documentation**  
**Al Smith Moving, Garfield Avenue Group**  
**PPG, Jersey City, New Jersey**

This appendix includes bills of lading (BOLs) for solid non-hazardous wastes which were removed during building demolition and excavation of the former Al Smith Moving (ASM) property as part of the soil remediation activities being conducted for the Garfield Avenue Group Sites. This appendix also includes BOLs for wastes removed during full-scale remedial activities, wastes generated during groundwater treatment system operation, and wastes not directly loaded during excavation activities (i.e., well installation and remedial investigation-related activities that occurred concurrently with remediation).

Some waste documentation included in this appendix was related to wastes generated during the installation of the decontamination pad and/or access area prior to the ASM demolition and excavation.

Additionally, bills of lading for non-hazardous liquid wastes generated between November 8 and November 10, 2017 and transported to the Passaic Valley Sewerage Commission (PVSC) are included.

ASM was excavated concurrently with portions of Site 133 East and Site 135. During this phase of work, waste manifests were tracked by sets of one to four grids. Loads that were from grids or sets of grids located only on Site 133 East or Site 135 are not included here. Loads that were removed from grids or sets of grids that straddle the ASM and Site 133 East or Site 135 boundaries are included in both Remedial Action Reports.
