

**Table 1-1
Area of Concern
Al Smith Moving, Garfield Avenue Group
PPG, Jersey City, New Jersey**

AOC ID	AOC Type	AOC Details
AOC ASM-1	Environmental media – Media Soil, including soil pore spaces	Fill consisting of CCPW and other materials impacted by Cr ⁺⁶ and CCPW Metals (antimony, chromium, nickel, thallium, vanadium). CCPW impacts were observed from ground surface to the underlying meadow mat or underlying un-impacted material.

Notes:

1. Groundwater impacted by CCPW and/or MGP-material throughout the GA Group is being tracked under PI number G000005480 for Site 114 (the location of the former Chromate Chemical Production Facility and MGP).

AOC - Area of Concern

CCPW - Chromate Chemical Production Waste

Cr⁺⁶ - hexavalent chromium

GA Group - Garfield Avenue Group

PI - Program Interest

MGP - manufactured gas plant
